Research to enhance Athletes' labour market transition and raising awareness of skills developed by Sport Shooting!

What is SkillX?

Innovative digital platform that radically transforms recruitment processes and job seeking. It uniquely connects employees' skills, attitudes, and personal competencies with employers' needs.

Proposal for completion:

Before training, gather the athletes and allocate 20 minutes for them to individually complete the questionnaire. Be honest and let your personal impressions and experiences guide your answers!

Participant requirements:
Active sport shooters above the age of 14

What is the research about?

- 1 This is the world's first international research aimed at connecting the world of sports with the professional labor market.
- 2 The participants are initially athletes from the sport shooting from multiple countries, making them pioneers in a comprehensive international sports survey.
- 3 The research will assess your ambitions and attitudes towards career building and employment alongside your professional sports activities.

Make a huge benefit for National Federation

- ✔ Outreach to clubs and coaches to engage athletes in completing the online questionnaire (15-20 minutes) – the questionnaire is online, reviewed.
- ✔ The National Federation will receive scientifically validated research results from the SkillX team, who use the official labor market competency matrix of the United States in their algorithm.
- ✔ Knowledge usability in coach education and developing athletes' dual careers (workshops, training sessions).
- ✔ Research goal: 200 questionnaires filled at least (to be validated).
